OrionAC – Company Overview & Vision Document

About Us

OrionAC (Orion Artificial Consciousness) is a student-founded educational AI startup built on the mission to revolutionize learning experiences across institutions through smart, agentic systems. We believe in building practical, scalable, and consciousness-inspired AI solutions that actively assist students and faculty — not just with information, but by taking action.

We're redefining traditional support systems with conversational AI that *remembers, navigates, helps apply,* and connects with real-world tools like Google Maps — all in real time.

Our Founder

Rishi (Zakaria) – Founder & CEO of OrionAC

A passionate AI enthusiast and **Smart India Hackathon 2023 Finalist**, Zakaria is driven by purpose. With experience mentoring over **200+ learners**, delivering **4000+ live sessions**, and working with top EdTech firms like BrightChamps and JetLearn, he quit his job to build OrionAC full-time — without safety nets, with only one focus: *create impactful AI.*

Our Mission

To develop Artificial Conscious Intelligence (ACI) that augments human learning by acting as intelligent assistants for academic institutions, students, and educators — focusing on *memory-retaining*, *task-capable*, and *real-world integrated* AI tools.

Our Flagship Product

Agentic AI Chatbot for Colleges

A powerful, memory-retaining chatbot built with:

- **LangChain** + **LangGraph**

- **Free Gemini API**

- **ChromaDB** (for RAG memory)

- Google Maps, Navigation Integration

- Application-filling automation

- Web form assistance

- Voice support (optional)

- Mobile responsive, fast, and customizable

Deployment: Lightweight Flask backend, embeddable widget for college websites.

Current Pilot:

We are working with **Joy University**, offering free integration during the admission season. Launch set for **May 15, 2025**.

What Makes Us Different

- **From Students, For Students**: We understand the struggles — and solve them from experience.

- **Agentic Memory & Action**: Not just a chatbot — an assistant that acts, automates, and remembers.

- **Built for Institutions**: College-specific capabilities including form help, navigation, department-wise routing, and more.

- **Modular & Affordable**: One-time setup + monthly update/support subscription.

- **Privacy-First**: Locally-hosted vector database, minimal cloud dependency.

Pricing

- **Setup**: ₹20,000 (includes chatbot integration, testing, and training)

- **Monthly Subscription**: ₹5,000 (for updates, new features, memory refresh, and performance support)

Special discounts available for early-stage or partner institutions.

Our Team

- **Zakaria (Rishi)** – Founder & AI Developer

- **Sashindra** – Backend & ML Engineer

- **Saileela** – UI/UX and Product Integration

- **Shona** – Head of Finance

We work nights and weekends — unpaid but driven, committed to building this dream into a sustainable, revenue-generating platform.

Support from the Community

"This team isn't waiting for perfect conditions — they're building anyway. With students, for students."
– Mentor from Smart India Hackathon 2023
